

Dear A.B.ers,

This summer packet comes with several sections. I suggest that sometime around August 20th you start working. The purpose of your work is to refresh your memory about concepts, which by then will seem a bit distant, so that in September we can "hit the road running".

"Calculus Readiness Test"

Do problems 1-32

Unit One: Elementary Functions

Read all of it carefully

Unit One: Multiple Choice

Do problems 1-149 ODDS

Unit Two: Limits

Read all of it carefully

Unit Two: Multiple Choice

Do problems 1-36

You will have an opportunity during the first class of the new school year to ask questions about problems in the packet. During the second class you will be tested on problems selected from the packet. (You will need to show work for full credit). The test will represent the first major grade of the first quarter. In the meantime, enjoy. Here's to a safe, happy, healthy, and long summer break.
